

honored the service and sacrifice of our World War II veterans and launched millions of families on a course to prosperity.

Last week, this House supported a new GI bill for the 21st century that will provide the same hopes and dreams to our troops fighting in Iraq and Afghanistan.

This bill is long overdue because the current GI bill fails to cover the full cost of a public education. The new GI bill restores the promise of a full 4-year college scholarship for veterans, and at a time when many of our troops are in the midst of multiple redeployments, we must keep our commitment to provide them the very best educational opportunities when their service is completed.

This bill is a promise to our veterans today and tomorrow that their service to this country will continue to be honored.

MOTHER NATURE IS NUMBER ONE OIL POLLUTER

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, the number one polluter of oil off our coast is Mother Nature. Crude oil seeps to the surface, and Mother Nature causes 62 percent of the crude oil pollution off our coast.

So the way we resolve this problem and get even with Mother Nature is we ought to drill where Mother Nature has that oil, take it out from the bottom of the Gulf of Mexico, and use it to take care of America.

But there is a problem with that. We don't drill anywhere except off my native Texas coast, off Louisiana, Mississippi, and part of Alabama. The rest of this, where it is red on this chart, is prohibited.

It is time for Congress to take the handcuffs off of this inaction and allow leasing off these shores.

Now they say that the oil companies have enough leases; why don't they drill there. The problem is when they drill there, they get a dry hole. And common sense says when they get a dry hole, they quit drilling even though they must continue to pay for those leases.

So it is time to let America take care of America. It is time to let our oil go and take care of ourselves, otherwise this red area that we see here will remain off-limits, and it should be drilled for the crude oil to take care of our country.

And that's just the way it is.

NO ROOM FOR RECKLESS TALK

(Ms. HARMAN asked and was given permission to address the House for 1 minute.)

Ms. HARMAN. Mr. Speaker, I have often said that the terrorists won't check our party registration before they blow us up. Security has been my

focus since coming to Congress seven terms ago. I have served on almost every security committee here, including 8 years on the Intelligence Committee.

Our security policy must not be partisan, and that is why last week's compromise on FISA was so meaningful. And that is why Charlie Black's comments in an upcoming Fortune magazine interview that another terrorist attack on U.S. soil "certainly would be a big advantage" to his candidate and that the Bhutto assassination "helped us" were so outrageous.

Yes, he and Senator McCain have apologized; and they should have. Another attack here or the assassination of a democratic political party leader anywhere harms all of us.

Seven years after 9/11, Osama bin Laden is still at large. The Taliban is resurgent in Afghanistan, and young kids still want to be suicide bombers. These are tough challenges, and there is no room for reckless talk.

OIL EVERYWHERE, NOT A DROP TO DRILL

(Mr. DANIEL E. LUNGREN of California asked and was given permission to address the House for 1 minute.)

Mr. DANIEL E. LUNGREN of California. Mr. Speaker, there is an old saying that goes: Water, water everywhere, but not a drop to drink.

Well, what we have in the United States is oil, oil everywhere, and not a drop to drill. That is the slogan of the Congress led by our friends on the other side of the aisle.

If you look at this map, you will see we have made off-limits some of the most potentially productive oil reserves and natural gas reserves not only in this country but in the world. It makes no sense whatsoever.

This week, instead of us addressing the problem this way, our friends on the other side of the aisle are going to bring us sue, sue, sue laws. That is, we are going to not drill our way out of this problem, we are going to sue our way out of the problem. The American people understand that's not the way to get us going.

Let's use American ingenuity, American creativity and technology to safely drill off our shores here in the United States so that we can become energy independent.

As we are coming up close to July 4, let's strike a blow for independence. Let's do something meaningful.

LEFT OVER THE BARREL

(Mr. OLIVER asked and was given permission to address the House for 1 minute.)

Mr. OLIVER. Mr. Speaker, the cornerstone of the Bush-McCain plan to lower gas prices is to open every acre of the Outer Continental Shelf between 50 and 200 miles offshore to oil leasing, drilling and production. That plan is a sure-fire failure.

You can bet your house and your children's college education as well that the most promising areas would be leased for long terms at bargain prices, but there is no guarantee that those new leases would be producing a drop of oil even 10 years from now. That's been the history.

The Minerals Management Service estimates 66 billion barrels of oil are recoverable on already-leasable areas of the continental shelf. Sixty-six billion barrels equals 10 years of America's need without any foreign oil at all. Yet less than a quarter of the area actually leased is in production. The oil companies are simply banking their cheap, long-term leases for future higher prices and profits. And we, the Congress and the country, will really be left over the barrel.

EXPLORE AVAILABLE ENERGY RESOURCES

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute.)

Mr. SHIMKUS. Mr. Speaker, let's talk about being put over a barrel of oil. In 2001, a barrel cost \$23. When this majority came in, it was at \$58, and now it is over \$136. The trend line is bad.

I don't understand why we want to limit our ability to explore all the available energy resources. Why not go after the leases we have. Why not open new leases. Why not go in the Arctic National Wildlife Refuge. Here is the OCS, off-limits by our mandate. We did it. The Congress said we can't go on the west coast. The Congress said we can't go on the east coast, and the Congress said we can't go on the east gulf. That is foolish at today's prices.

Let's use America's natural resource of coal. In Illinois alone, we have as much Btu as Saudi Arabia has in oil. Let's encourage coal-to-liquid technologies. Let's use solar and wind, and all of the above energy sources, man-made energy resources with American energy and U.S. jobs.

TITLE IX IS SLAM DUNK

(Ms. LINDA T. SANCHEZ of California asked and was given permission to address the House for 1 minute.)

Ms. LINDA T. SANCHEZ of California. Mr. Speaker, a player dunked in a Sunday night basketball game. Most Americans might not think that's news, but when you tell them the player was the WNBA's Candace Parker, only the second woman to dunk in WNBA history, you get a different reaction.

Parker's slam dunk is just one more sign that title IX is a slam dunk. At its core, title IX is a one-sentence law that bans sex discrimination in Federally funded education programs. Title IX tore down the quotas in law and medical schools that would often limit the enrollment of women to 15 per year.

Today, more women than men are attending college. And in law schools,
